

# Website Planing Document: Donavaghn Jarvie

**Site name:** Venture Weather

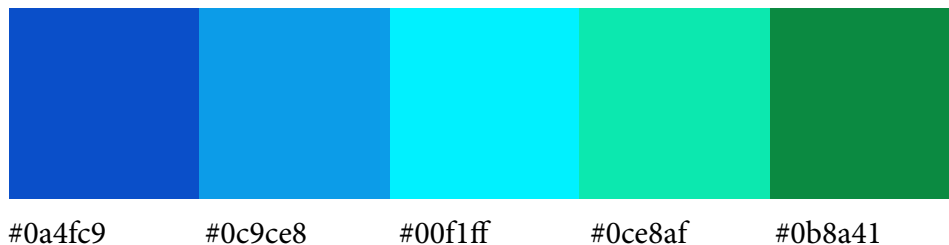

**Site Purpose:** To provide weather description and analysis to estimate the best time for adventurous and fun activities.

**Target Audience:** Older Children, Teenagers, and Young adults.

**Site map:**

**Color Scheme:**

I decided that because of the adventurous theme an analogous color scheme of blues and greens would work well. I will probably adjust the colors slightly after I put the whole thing together.

**Typography:**

Source Sans Pro

*Seaweed Script*

**To continue with the adventure theme I selected one decorative font and one that is simple, but feels more modern to go with the target audience.**
